

Luca Brocco

**Junior Data scientist,
Physicist, AI Engineer**

**enrolled in:
LM-17 Physics of Data
UniPd**

Luca Brocco

Via Mons. Pasquini 54 - Quarto d'Altino (VE) - 30020
Via S. Francesco 126 - Padova (PD) - 35121

(+39) 3703300427 lucabrocco31@gmail.com

**AWS Bedrock, Python, Dask, Docker, SQL, R, Data Analysis and
Visualization, Machine Learning, Teaching, C1 CAE English level**

Present occupation

**LM-17 Physics Of Data Student (UniPd) (present average degree:
29.11/30). Graduation est. September 2026**

My MSc path merges the skills of a Physicist with the ones of a Data Scientist. I learnt how to solve complex problems using advanced techniques and exploiting big Datasets.

Data Scientist / AI Engineer Stage @ OMNYS (Mar. - Jun. 2026)

During my Stage at OMNYS I am involved in LLM training and fine tuning using state-of-the-art techniques (SFT, RAG, DPO) for specific tasks in a limited resources scenario.

CUAMM Volunteer

As a volunteer for Doctors with Africa - CUAMM I take part in promotion activities in Padova and nearby areas.

Experience

Data Scientist Stage @ UniPr

(Aug. 2025 - Oct. 2025, Parma)

During my stage at UniParma I joined a research group involved in epidemiology and forecasting of outbreaks caused by vector borne diseases. You may have a look at my [presentation](#).

Academic projects

(Dec. 2024 - Sep. 2026)

I have implemented many advanced Data Analysis solutions for academic projects, making use of most cutting edge technologies. Meteo forecast, Renewable Energy Production, Protein Secondary Structure prediction, parallelization for paper analysis, MAGIC datasets and more were subjects of my past projects.

Formation

Bachelor Degree in Physics (LT-30 Fisica)

(Ott. 2021 - Dic. 2024, University of Padua)

During my bachelor degree I was able to acquire a deep knowledge of classical and modern Physics, experimental Physics, advanced Mathematics and Statistics and coding in Python and C++

Maturità Scientifica, Liceo Scientifico "L. da Vinci" (Jun. 2021, Treviso)
